**DISCLAIMER**

- Photos shown online, in our brochures, and physical samples that you receive are representative of the species only. Variation in color, figure and other natural characteristics including but not limited to thickness, translucency, texture, grain pattern, wood knots, amount of grain and color, including within the same specie, can occur. Wood veneer is a natural product and will always exhibit individual features and character marks.
- Printing on a dark wood, ie Walnut and Koa, may cause the printing not appear as legible as compared to a light colored wood specie.
- Ring-porous woods such as Ash, Oak, Sassafras and Walnut do not print as well due to open grain. Ring-porous woods are slightly thicker. With the varying density of grain in these woods, flexible areas within the veneer will occur naturally.

*Thank you for choosing Cards of Wood.*

*We are very happy to have your business and look forward to working with you.*
